Superpower illustrates how the US has leveraged its position to ensure unilateral world domination through absolute economic and military superiority and government deception.

*Superpower* asks tough questions and goes behind the scenes of America's national security apparatus and military actions. This well-balanced film straddles the philosophical divide and allows viewers to understand the US quest for global dominance through economic and military strategy exposed through review of historical events, personal interviews, and analysis of US foreign policy.

*Superpower* presents a view of US foreign policy that lies in stark contrast to that depicted by corporate media, popular pundits, and US heads of state.

"The only thing new in the world is the history you don't know." ~Harry S. Truman

"Huckleberry Finn is the great work of our national literature because, more than any other book before or since, it locates itself squarely on our National Dilemma, which is: How can anyone be truly free in a country as violent and stupid as ours?"  
~George Saunders

"I do not know how the third world war will be fought, but I can tell you what they will use in the fourth... rocks." ~Albert Einstein
