UPandOUT 3rd Thursdays, free film series

Showing Thursday, Feb 21

6:40pm doors open
7pm film starts promptly

243 Broadway, Cambridge
corner of Broadway & Windsor, entrance on Windsor

Next month, Mar 21: *Roadmap to Apartheid*
(the striking parallels between So African & Israeli apartheid)

Genetic Roulette

[85 min]

the Gamble of Our Lives

S Genetically engineered foods: Experts expose the SERIOUS THREATS to your health and how corporations like Monsanto hide the facts. Are you and your family on the wrong side of a bet?

y New evidence points to genetically engineered foods as a major contributor to rising disease rates in the US population, especially among children. Gastrointestinal disorders, allergies, inflammatory diseases, and infertility are just some of the problems implicated in humans, pets, livestock, and lab animals that eat genetically modified soybeans and corn. (If GMO foods are so safe, why aren't they tested on humans?)

N Monsanto's strong arm tactics, the FDA's fraudulent policies, and how the USDA ignores a growing health emergency are also laid bare. This sometimes shocking film may change your diet, protect you and your family, and accelerate the consumer tipping point against genetically modified organisms (GMOs) now underway.

"The story of barbecue is the story of America: Settlers arrive on a great unspoiled continent, discover wondrous riches, set them on fire and eat them." ~Vince Staten

"As for butter versus margarine, I trust cows more than chemists." ~Joan Gussow

"If organic farming is the natural way, shouldn't organic produce just be called "produce" and make the pesticide-laden stuff take the burden of an adjective?" ~Terri Guillemets

"We don't need a melting pot in this country, folks. We need a salad bowl. In a salad bowl, you put in the different things. You want the vegetables - the lettuce, the cucumbers, the onions, the green peppers - to maintain their identity. You appreciate differences." ~Jane Elliot
